

S&A Manufacturing, located in central California, manufactures and sells a full line of fertilizer handling and spreading equipment. Included in S&A's product line are spreaders for a variety of materials including, commercial fertilizers, lime, gypsum, compost, sand, bark, humus, manure, and many other types of spreadable material.

Our TL 11.5-15 Transloader is made for quick and efficient loading and unloading of railcars and trucks. When equipped with a 46 HP Deutz diesel engine, this unit has power to spare!

Conveyors, portable or fixed, are also designed to move the desired material ranging from pellets, pea gravel, lime, seed, bark, walnuts, almonds, and commercial fertilizer.

Storage containers, bulk bins, and tanks, are available in portable and fixed configurations up to a 100- ton capacity.
